

... turn an old patio, walk or drive into a new one or create one that's totally different.

The ROYAL LINE RESIN grit SYSTEMS of bonding fine - mesh grit or stone aggregate into permanent surfaces offer myriad possibilities for improving exterior areas around residences.

The aggregate system allows stone to be used in any color or texture to build a patio, pool deck or walk that water will penetrate, eliminating puddles. This same characteristic makes the surface excellent as a replacement for conventional mulching around plants.

The grit system widens design opportunities By letting you use natural materials in a surface that resists weathering and is non-skid, whether used over old or new cement concrete on drives, patios or around pools.

RESIDENTIAL USES OF ROYAL LINE RESIN grit SYSTEMS

The ROYAL LINE RESIN grit SYSTEM adds the final touch to this lake front property with two colors.

The grit system compliments this theatre entrance way with brass terrazzo strips and black grit.

Mortar Paste system used to improve the steps and risers at this hotel with two colors for safety.
